The Square Yard Now Offers the Finest Cork Flooring.

"Add an Organic Touch to Your Space".

Environmentally Friendly Green Product!

Summit, NJ – February 29th, 2008. *The Square Yard* is now offering the finest cork flooring. Since the early 1900's, cork has been used as an alternative surface flooring. By constantly utilizing advanced technologies, cork continues to improve durability, simplify maintenance, and develop new patterns and colors to satisfy current design trends suitable for a variety of flooring needs.

Cork flooring is a healthy choice and a good investment that when properly maintained, will last for generations. Comprised of a renewable natural material, cork is environmentally friendly, as much as it promotes improved health and comfort for human indoor living. In our homes, cork floors create a warm, comfortable, resilient surface that is gentle underfoot, is anti-microbial, fire-resistant, and is inherently resistant to molds, mildew, and common pests such as termites.

Natural cork products offer a combination of benefits that no other floor covering can match. They are:

Durable

Natural cork flooring is protected with 5 coats of durable UV cured acrylic finish.

Sweeping and cleaning using a hardwood floor cleaner is all that is necessary for regular maintenance. A new coat of polyurethane will rejuvenate a floor that has begun to show signs of wear. Well maintained, your cork floor will last for decades.

Comfortable

Cork provides a comfortable cushion underfoot. Cork bounces back, so recovery from marks caused by furniture will leave minimal residual indentation, less noticeable than on wood, carpet, or vinyl floors. This same resilient quality provides a warm and noiseless surface for any room.

Fire Resistant

Cork is a fire inhibitor and will not spread flame. Cork also does not release toxic gasses on combustion.

Thermal and Acoustic Insulator

Made up of over 100 million prism shaped cells per cubic inch, each one filled with air, cork inhibits the conduction of temperature and sound. Cork floors reduce impact noise, a great asset for applications such as multi-level housing, office spaces, museums and places of worship. Walking barefoot in your bedroom or bathroom in the middle of a cold night is a warm, quiet, and comfortable experience.

Anti-microbial and Insect Repellent

Suberin, an inherent substance of cork, is a natural insect repellent. Even termites are kept away. Cork is anti-microbial and is resistant to mold and mildew. If allergies are a problem, yet you enjoy the comfort and warmth of carpet, cork is the ideal alternative.

The natural cork product line presents consumers with the highest quality cork flooring available on the market today.

The Square Yard, located on Springfield Ave. in Summit, NJ, is enjoying its 35th year as one of the premier design centers on the east coast. The Square Yard provides complete one-stop design service for clients in the community of Summit and as far away as The Hamptons, offering the traditional and the exotic in luxury floor coverings in wood, carpet and tile, custom wall coverings, window treatments and home furnishings.
